

Mill Shift Supervisor – Consultant

New Mining Project Residential – Dominican Republic

GlobeStar Corporation is currently developing the first copper mine in the Caribbean region. The project is located near the center of the Dominican Republic and is only a few hours' drive away from the beach and the capital city of Santo Domingo. The mine and processing facilities are under construction and will be commissioned in the Summer 2008. The operation will become a producer of copper, gold and silver.

The mill facilities will have both a sulphide copper and oxide gold operation. The sulphide and oxide plants will utilize a range of conventional crushing, grinding, flotation, leaching and Merrill-Crowe to produce copper concentrates and doré.

Reporting to the Mill Superintendent, the appointee will play a key role in plant commissioning and be responsible for the effective coordination and management of a shift production crew while training Dominican shift supervisors during the first year of operations. The key objective of the role will be to lead and develop the shift team to optimize metallurgical performance and achieve the highest possible standards in occupational health and safety, environmental compliance and cost effectiveness.

The position requires an individual who has at least 5 years of supervisory or senior operator experience in metallurgical operations and expertise in grinding, cyanide leaching using Merrill-Crowe and flotation technology. The appointee must be able to demonstrate a capability to provide effective leadership to a production crew and have a strong commitment to employee relations, training, safety and metallurgical performance. The ability to communicate in the Spanish language is a must.

The position provides an excellent opportunity for a competent and enthusiastic individual to be involved in this new mining operation. We are offering a very attractive compensation package and employment conditions to recognize the skills and experience required by the individual for this role.

The initial term of the appointment is one year and will be an 8 week on 2 week off working rotation.
